Placement of Flashes and Badges

Congratulations on receiving a Flash or Badge. That is a huge achievement and you can be very proud of yourself!

Now it is time to place it on one of your school t-shirts so others can admire it...and you can show it off!

The photo below will show you how these are to be worn and attached. Please make sure that you follow these instructions.

Flashes

- Flashes are to be attached on the opposite side of the school logo (The left side looking at the shirt front on).

- The first one is to be placed at the same height as the bottom of the button line halfway across. With the others directly below it.

- Heat sealing the flash on **clothes** can be achieved by placing the t-shirt on a flat surface (ironing boards are best). Next, you set the Flash on the place you want nice and straight, and cover it with a thin fabric over top (this prevents the flash from disfiguring from the heat or your t-shirt). You then place the iron on the Flash and press evenly until it sticks.

Badges

Are to be pinned above the Flashes with the first one going in the middle and the other two on either side.

Thanks!
